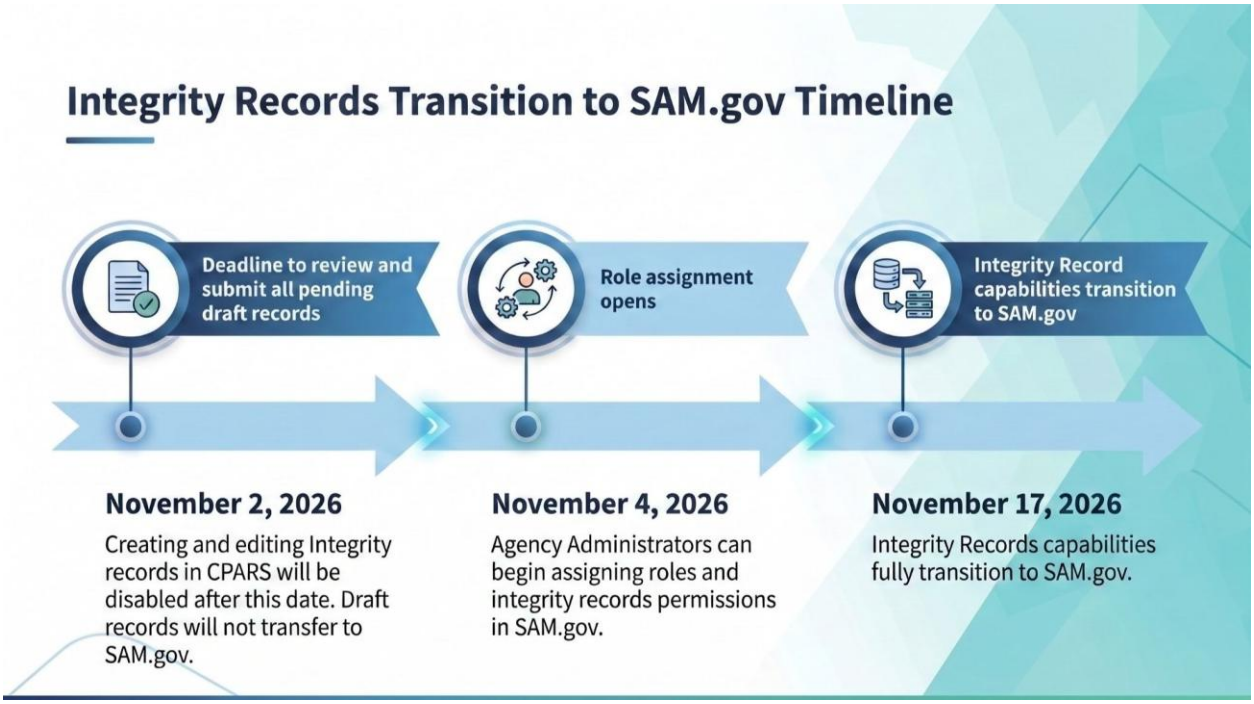
As part of its ongoing systems modernization effort, users soon will begin creating Integrity Records in SAM.gov and will stop creating them in CPARS.gov.

Transition Timeline

GSA expects to transition this functionality on November 17, 2026. Please review the timeline to ensure your records and role assignments are completed before the transition date:



Draft records on CPARS

As part of its ongoing systems modernization effort, users soon will begin creating Integrity Records in SAM.gov and will no longer be able to create them in CPARS.gov. Please review any draft records you have in CPARS.gov and complete the necessary actions by **November 2**, **2026**. Creating and editing Integrity records on CPARS will be disabled at that time to prepare for the transition. Any records not submitted before the deadline will be permanently deleted.

SAM.gov role assignments and permissions

Agency Administrators will have access to assign roles and grant permissions for integrity records creation inside SAM.gov starting **November 4, 2026**.

Existing roles within CPARS will not migrate automatically to SAM.gov during this transition. Access permissions for integrity records creation inside SAM.gov will be assigned according to the specific type of record, aligned with individual SAM roles as detailed below.

The permission that should be enabled on the user account is “Integrity Records.”

Note: Administrators will automatically have the Integrity Records permission enabled.

SAM.gov Designated Role with Integrity Records Permission	**SAM.gov Role Domain**	**Associated Integrity Record Types**
Agency Administrator Exclusions Agency Exclusions Representative	Exclusions	Administrative Agreements
Administrator Contracting Officer Contracting Specialist	Contract Data	Acquisitions records: • Defective Pricing • Information on Trafficking in Persons • Non-Responsibility Determination • Subcontractor Payment Issues • DoD Determination of Contractor Fault
Assistance Administrator Grants Officer (new SAM role)	Assistance Listing (to be renamed to Federal Assistance)	Federal assistance records: • Material Failure to Comply with Closeout Requirements

		• Recipient Not-Qualified Determination • Termination for Material Failure to Comply

All CPARS users should work with their Department POCs (DPOCs) to verify they can be granted the appropriate role on SAM.gov. As soon as role configurations are live on SAM.gov, notifications will be sent out to DPOCs to ensure everyone has adequate time to register or be assigned their roles.
